NEWARK PUBLIC LIBRARY

FOREWORD

This is the sixth in the series of the publication titled World Weather Records. The earlier issues, which included climatological information through 1960, have had global distribution and have been widely used for meteorological and climatological research. This volume provides data for Islands of the World for the 1961-70 period.

At its Sixth Session in Bad Homburg, Federal Republic of Germany, in October 1973, the Commission for Special Applications of Meteorology and Climatology (CoSAMC) of the World Meteorological Organization, in Resolution 7, accepted the offer of the United States to publish the "World Weather Records, 1961-70." The United States agreed to collect and edit the 1961-70 data for Region IV (North America). It was suggested that Regional Associations I, II, III, V, and VI arrange in the most suitable way within each Region for the collection and preparation for publication of the data in the "World Weather Records, 1961-70".

The United States extends its gratitude to the meteorological services and other organizations who graciously supplied data and particularly to the New Zealand Meteorological Service for acting as data collector for Region V. The present volume for Islands of the World contains data for all areas included in previous issues of World Weather Records.

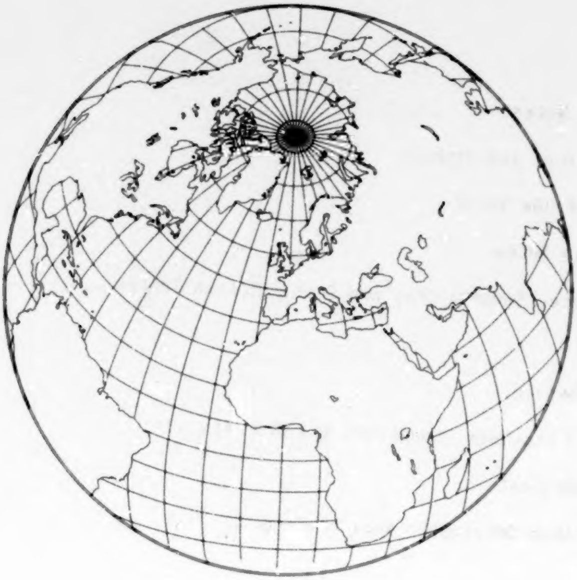
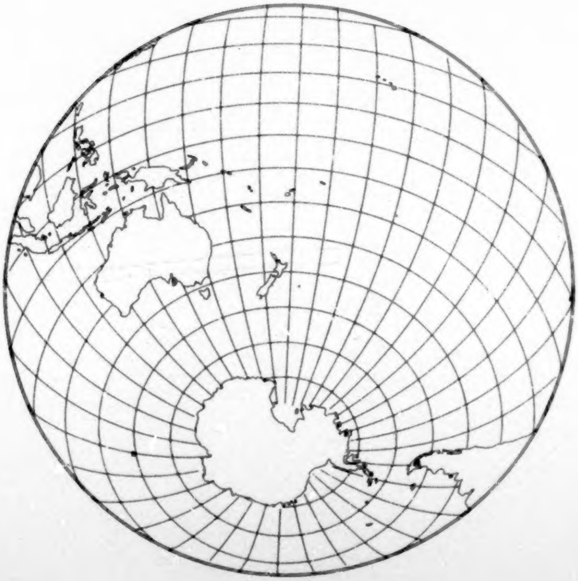
WORLD WEATHER RECORDS





EDITORIAL NOTES

This issue of the World Weather Records is primarily concerned with data for 1961-70. As in previous issues, data for earlier years have been included when appropriate and available. The first issue included data from earliest records available at that time up to 1920. Data for periods 1921-1930, 1931-1940, 1941-1950, 1951-1960 were published in succeeding issues. The present volumes continue, insofar as possible, the record of monthly mean values of station pressure, sea level pressure, temperature, and monthly total precipitation for stations listed in previous volumes. New stations are also included when data were available.

Information concerning the exposure of instruments, hours of observation, and methods of adjusting or correcting observational data has been included in station notes whenever it was supplied.

SOURCES OF DATA

Unless otherwise stated in the station notes, data were supplied to the Regional collector by national meteorological services whose addresses may be found in publications of the World Meteorological Organization. The data have been published as received by the United States from the Regional collector. CLINO data are long term means taken from the World Meteorological Organization publication, Climatological Normals (CLINO) WMO/OMM-No. 117 T.P. 52 or are values supplied by the respective authorities.

GROUPING OF STATIONS AND ARRANGEMENT OF DATA

The six volumes of the World Weather Records have been so arranged as to provide a natural geographic separation into what are essentially units of a single continent. Two of the volumes, however, contain island and Ocean Weather Station data as well as those of the smaller continents. Insofar as possible the National Climatic Center has also drawn upon the World Meteorological Organization structure for guidance. For example, Israel and Jordan, which are Members of the World Meteorological Organization Region VI - Europe, appear in the volume for Europe.

Within each volume the data are presented alphabetically by station within geographic areas which usually, but not necessarily, coincide with political entities.

Two indexes have been included in the rear of this volume to locate desired information. The first is a master list of all locations (station or area) included in this volume, listed alphabetically without regard to geographical division or country. In the second index, station names are listed in alphabetical order for each major geographical area or country.

The data tables for each station are headed with the station name, the geographic subdivision or country name, the WMO number wherever one has been assigned, the latitude, longitude, and the station height above mean sea level. Unless otherwise noted in the station notes, the information presented in the table headings were those in use at the close of the period for which data are published. Also included in the headings are the page numbers where the station notes are located.

ADJUSTMENTS FOR HOMOGENEITY

World Weather Records published after the 1941-50 issue have not provided for homogeneity of records by adjusting the most recent period to the earlier period. In the 1951-60 volume and this volume, data have been published as received. No attempt has been made to correct for relocation of stations or changes in instrumentation or procedures. Any factors which might affect the homogeneity of the record have been included in the station notes whenever supplied.

CONVERSION OF UNITS

The data are presented in metric units as received.

The totals of precipitation are understood to include all forms of precipitation: rain, snow, sleet, hail, etc. The letter "T" denotes an amount of precipitation more than zero but less than one-half millimeter.

METHODS OF AVERAGING

Unless otherwise described in the station notes, monthly period means are the sums of the monthly means divided by the number of years for which data are available. Five or more years of monthly means are required for computation of monthly period means. Annual means of pressure and temperature are one-twelfth (1/12) of the monthly or period means.

UNITS IN STATION NOTES

The units of height and and distance used in the station notes are those furnished by the respective countries and are metric.

H_p : Height (above mean sea level) to which station pressure shown in this volume has been reduced. If different heights have been used for different periods, the information is contained in Station Notes.

H_z : Height of the barometer above mean sea level for the period shown.

H : Height of the ground at the station above mean sea level.

h_t : Height of the thermometer above ground.

h_r : Height of the rim of the precipitation gauge above ground.

Lat : Latitude of the station.

Long : Longitude of the station.

E : Data have been estimated by the method described in Station Notes for that station, or based on incomplete data, or are uncertain for some other reason

ISLANDS OF THE WORLD

STATION NOTES

STATION NOTES

GENERAL:

Data and station notes for the following contries, island groups and/or stations were collected by the New Zealand Meteorological Service.

- Antarctica
  - Davis
  - Mawson
  - Scott Base
  - Wilkes/Casey
- Australia
- Austral Islands
- Cocos Island
- Cook Islands
- Ellice Is. (Tuvalu)
- Fiji Islands
- Gambier Islands
- Gilbert Is. (Kiribati)
- Indonesia
- Line Islands
- Lord Howe Island
- Macquarie Island
- Malaysia
- Marquesas Islands
- New Caledonia
- New Hebrides
- New Zealand
- Niue Islands
- Norfolk Island
- Ocean Is. (Banaba)
- Papua New Guinea
- Philippines
- Pitcairn Island
- Republic of Nauru
- Samoan Islands
- Singapore
- Society Islands
- Solomon Islands
- Tokelau Islands
- Tonga Island
- Tuamotu Islands
- Wallis Island

Several newly independent nations now have different names. Since the data refer to the previous regime, the former country name has been used. The current name is indicated in parentheses in the station notes and table headings.

For the above stations, decadal means were computed for all the monthly columns including those with missing data, but annual means or totals were not included where data are missing. All the data were subjected to machine checks; some errors in the original contributions were corrected but minor discrepancies in means or totals were left unchanged. The data for Indonesia were presented as received, but the number of months with nil rainfall reported appears suspect. These may in fact have been missing reports.

Data and station notes for Greenland, Faroes and Iceland were collected by the Federal Republic of Germany.

STATION NOTES

GENERAL (con.):

Data and station notes for the following countries, island groups and/or stations were collected by the United States (National Climatic Center).

- Antarctica
    - Amundsen Scott
    - Byrd Station
    - Cape Hallett
    - Ellsworth Station
    - McMurdo
- Canary Islands
- Caroline Islands
- Comoros Islands
- Hawaii
- Ile Europa
- Ile Nouvelle Amsterdam
- Iles Glorieuses
- Iles Kerguelen
- Ile Tromelin
- Johnston Islands
- Malagasy Republic
- Marcus Island
- Mariana Islands
- Marshall Islands
- Mauritius
- Midway Island
- Ocean Weather Stations
- Phoenix Islands
- Reunion Island
- Sao Tome and Principe
- St Helena
- Volcano Islands
- Wake Island

Data for the following countries, island groups and/or stations were obtained from the "World Monthly Surface Station Climatology", National Center for Atmospheric Research, Boulder CO, (United States). Station notes are not available for these stations.

- Acores
- Andaman Islands
- Antarctica
    - Argentine Island
    - Base Roi Baudouin
    - Dumont D'Urville
    - Halley Bay
    - Mirnyj Observatory
    - S.A.N.A.E. Station
    - Syowa Base
    - Vostok
- Bonin Islands
- Cape Verde Islands
- Falkland Islands
- Izu Shichitu Island
- Jan Mayen
- Laccadive Islands
- Madeira Islands
- Marion Island
- Ryukyu Islands
- South Georgia Islands
- South Orkney Islands
- South Shetland Islands
- Spitsbergen
- Tristan Da Cunha

The WMO station number for Chichijima has been changed from 91030 in the previous edition to 47971 in this edition.

STATION NOTES

ANTARCTICA (17 stations)

General:

The services supplying these data are credited in the notes under the individual stations. The stations are listed alphabetically as a group. All data received are published even for very short periods. Very little precipitation data were available because of the extreme difficulty in obtaining accurate measurements due to very high winds and blowing snow. Latitude, longitude, and elevation given in the table headings were those in use at the close of 1970.

Amundsen Scott, U.S.A.

Dates	Location	Lat	Long	H	Hp	ht	hr
1/1/61-31/12/70	South Pole	90 00 S	-	2800	2800	1	1

Argentine Island, United Kingdom

No notes available.

Base Roi Baudouin, Belgium

No notes available.

Byrd Station, U.S.A.

Dates	Location	Lat	Long	H	Hp	ht	hr
1/1/61-17/2/62	Depression in snow plain	80 00 S	120 00 W	1512	1515	2	1
18/2/62-31/12/70		80 01 S	119 31 W	1553	1530	2	

Cape Hallett, U.S.A.

Dates	Location	Lat	Long	H	Hp	ht	hr
1/1/61-31/12/70	Seabee Hook, Moubary Bay	72 19 S	170 13 E	3	5	2	1

ANTARCTICA (con.):

Davis, Australia

General:

Latitude, longitude, and elevation given in the table headings were unchanged throughout the period. The station was closed on 31 October 1964 and re-opened on 1 March 1969.

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Precipitation:

Because of the difficulty of obtaining accurate measurements, no data have been supplied.

Pressure:

Station pressure was corrected to 0 degrees C and standard gravity of 9.80665 m per second square. A Kew pattern mercury-in-glass barometer was used. Barometer height, 13 m. The method used to reduce pressure to MSL assumed a fictitious column of air with a constant lapse rate of 0.0065 degrees C per gpm. Temperature and humidity at the top of the column were given by the station's mean monthly temperature and vapor pressure. Pressures were calculated by:

1/2(09h + 15h)LST

Dumont D'urville, France

No notes available.

Ellsworth Station, U.S.A.

Dates	Location	Lat	Long	H	Hp	ht	hr
1/1/61-28/2/62	Filchner Ice Shelf	77 44 S	41 07 W	42	43	2	

Halley Bay, United Kingdom

No notes available.

ANTARCTICA (con.):

Mawson, Australia

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Precipitation:

Because of the doubtful reliability of measurements, no data have been supplied.

Pressure:

Station pressure was corrected to 0 degrees C and standard gravity of 9.80665 m per second square. Barometer height, 13 m. The method used to reduce pressure to MSL assumed a fictitious column of air with a constant lapse rate of 0.0065 degrees C per gpm. Temperature and humidity at the top of the column were given by the station's mean monthly temperature and vapor pressure. Pressures were calculated by:

1/2(09h +15h)LST

McMurdo, U.S.A.

Dates	Location	Lat	Long	H	Hp	ht	hr
1/1/61-31/12/70	Hut Point Peninsula	77 53 S	166 44 E	26	26		

Mirnyj Observatory, U.S.S.R.

No notes available.

S.A.N.A.E. Station, South Africa

No notes available.

Scott Base, New Zealand

Pressure:

Mean of the 09h observation corrected to sea level. Barometer cistern height, 15 m.

Temperature:

1/2(mean daily maximum plus mean daily minimum)

STATION NOTES

ANTARCTICA (con.):

Syowa Base, Japan

No notes available.

Vostok, U.S.S.R.

No notes available.

Wilkes Casey, Australia

General:

Data for Wilkes (Jan 1961 to Dec 1969) and Casey (Jan to Dec 1970) have been combined. The geographical coordinates and elevations given in the table heading refer to Wilkes. The corresponding figures for Casey were latitude 66 15 S, longitude 110 32 E, height of station 12 m, height of barometer 14.9 m. Barometer height at Wilkes was 11 m.

Temperature:

A Bendix-Friez thermocouple temperature recorder was used at Wilkes. From 1 May 1970, temperatures at Casey were obtained from a Fielden remote temperature indicator. Temperature means were calculated by:

1/2(mean daily maximum plus mean daily minimum)

Precipitation:

Because of the doubtful reliability of measurements, no data have been supplied.

Pressure

Station pressure was corrected to 0 degrees Celsius and standard gravity of 9.80665 m per second square. An American Fortin barometer was used at Wilkes until the end of 1964, when it was replaced by a Kew pattern mercury-in-glass barometer. The method used to reduce pressure to MSL assumed a fictitious column of air with a constant lapse rate of 0.0065 degrees C per gpm. Temperature and humidity at the top of the column were given by the station's mean monthly temperature and vapor pressure. Pressures were calculated by:

1/2(09h + 15h)LST

STATION NOTES

AUSTRALIA (58 stations)

General:

Latitude, longitude, and elevation were those in use at the close of 1970. The CLINO data have been taken from WMO/OMM No.117 T.P. 52 (1931-60). The station numbers used for Talgarno, Daly Waters, Maralinga, Broken Hill, and Adelaide were correct during 1961-70, but have since been allocated to other sites. Listed below are these and other stations where the site or barometer height has changed during the period.

Instrumentation:

Thermometers were suspended in a Stevenson screen with the bulb approximately 1.2 m above the ground, and the rain gauge rim 0.30 m above ground level. A Kew pattern mercury-in-glass barometer was used.

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Precipitation:

Daily measurements were made at 09h local standard time. Data were recorded in points and subsequently converted to tenths of mm. Amounts less than one-half point were recorded as zero.

Pressure:

Station pressure was corrected to 0 degrees C and standard gravity of 9.80665 m per second square. At stations where the barometer height has changed, decadal means of station pressure were not calculated. Height changes of 2 m or less were not taken into account when calculating MSL pressure, but are noted in the list of height changes. The method used to reduce pressure to MSL assumed a fictitious column of air with a constant lapse rate of 0.0065 degrees C per gpm. Temperature and humidity at the top of the column were given by the station's mean monthly temperature and vapor pressure. Pressures were calculated by:

1/2(09h + 15h)LST

STATION NOTES

AUSTRALIA (con.):

Numbers now allocated to other stations:

Station Number	Station for which data is supplied	Station to which number is now allocated	Comments
94207	Talgarno	Rowley, Shoal A.W.S.	Talgarno closed in 1963.
94234	Daly Waters M.O.	Daly Waters P.O.	Location and elevation refer to the meteorological office.
94650	Maralinga	Yalata	After 1967, Maralinga observed rainfall only.
94675	Adelaide (West Terrace)	Adelaide Regional Office	Regional office moved to a new site in 1977.
94689	Broken Hill P.O.	Broken Hill Royal Flying Doctor Station	Location and elevation refer to post office.

Site changes:

Perth regional office moved to a new site in East Perth on 23 June 1967, a distance of about 2 km from the original site.

Sydney regional office moved to a new site on 10 September 1963. The barometer was moved to the new site, but the instrument enclosure was unchanged.

Hobart regional office shifted to a building adjacent to the old office on 14 July 1966, and this entailed a very minor change of site.

Melbourne regional office moved on 1 September 1962 and 24 September 1966; both moves within 500 m of the original site. The barometer was moved, but the instrument enclosure was unchanged.

STATION NOTES

AUSTRALIA (con.):

Barometer height changes:

Station Number	Station Name	Original Height (m)	Date of Change	Subsequent Height (m)
94653	Ceduna	19	5-3-69	17
94711	Cobar	264	20-5-62	265.5
94791	Coff's Harbour	3	31-7-67	5
94403	Geraldton	28	30-9-66	33
94212	Hall's Creek	408	4-7-67	422*
94970	Hobart R.O.	54	14-7-66	57
94868	Melbourne R.O.	35	1-9-62	27.7**
94693	Mildura	49	30-6-61	50
94821	Mt. Gambier	65	12-2-64	69
94476	Oodnadatta	113	12-5-69	117
94608	Perth R.O.	64	23-6-67	20
94768	Sydney R.O.	42	10-9-63	92
94910	Wagga	216	1-6-65	214.9

*The barometer at Hall's Creek was moved a second time, on 26 November 1969, to a height of 408 m.

**The barometer at Melbourne R.O. was moved a second time, on 24 September 1966, to a height of 38.1 m.

STATION NOTES

AUSTRAL ISLANDS (1 station)

General:

Latitude, longitude, and elevation given in the table heading were those in use at the close of 1970. Barometer height, 6 m.

Pressure:

1/4(mean maximum for the day plus mean minimum for the day plus mean maximum for the night plus mean minimum for the night)

Temperature:

1/2(mean daily maximum plus mean daily minimum)

CANARY ISLANDS (4 stations)

Barometer heights:

Izana, 2368 m; Las Palmas/Gando, 25 m; Santa Cruz de Tenerife, 46 m; Tenerife/Los Rodeos, 618 m.

STATION NOTES

CAROLINE ISLANDS (8 stations)

General:

Station names, elevations, and coordinates in the table headings were those in use at the end of 1970 or for the last year of data published.

Station Pressure:

Monthly means of station pressure were computed using eight observations per day.

Sea Level Pressure:

The monthly mean sea level pressures were computed by summing all observed station pressures reduced to sea level and dividing by the number of observations.

Temperature:

The monthly mean temperature is one-half the sum of the monthly mean daily maximum and the monthly mean daily minimum temperatures. Temperatures were not adjusted for changes in location.

Precipitation:

An 8-inch or tipping bucket rain gauge was used to measure precipitation.

Station Data:

Date	Station Name	Lat	Long	H	Hz	Hp	ht	hr
1/1/61-31/12/70	Anguar, Palau Group	06 55 N	134 09 E	5			5	3
1/1/61-31/12/70	Falalop Is., Ulithi	10 02 N	139 48 E	2			2	1
1/1/61-31/12/70	Koror	07 20 N	134 29 E	29	30	33	2	1
1/1/61-31/12/70	Lele Is., Kosrae	05 20 N	163 03 E	2			1	1
1/1/61-31/12/70	Ngasang, Babelthuap	07 37 N	134 39 E	3				1
1/1/61-31/12/70	Ponape	06 58 N	158 13 E	37	38	46	2	1
1/1/61-31/12/70	Truk	07 28 N	151 51 E	2	3	2	1	1
1/1/61-29/2/68	Yap	09 31 N	138 08 E	19	18	17	2	1
1/3/68-31/12/70		09 29 N	138 05 E	13	15	17	2	1

STATION NOTES

COCOS ISLAND (1 station)

General:

Latitude, longitude, and elevation given in the table heading were those in use at the close of 1970.

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Instrumentation:

Thermometers were suspended in a Stevenson screen with the bulb approximately 1.2 m above the ground and the rain gauge rim 0.30 m above the ground. A Kew pattern mercury-in-glass barometer was used.

Precipitation:

Daily measurements were made at 09h local standard time. Data were recorded in points and subsequently converted to tenths of mm. Amounts less than one-half point were recorded as zero.

Pressure:

Station pressure was corrected to 0 degrees C and standard gravity of 9.80665 m per second square. The method used to reduce pressure to MSL assumed a fictitious column of air with a constant lapse rate of 0.0065 degrees C per gpm. Temperature and humidity at the top of the column were given by the station's mean monthly temperature and vapor pressure. Pressures were calculated using 1/2(09h + 15h)LST.

COMOROS ISLANDS (2 stations)

Pressure:

Pressure reduced to 0 degrees C at the station level, after applying the instrument correction and the gravity correction. Barometer heights: Dzaoudzi/Pamanzi, 8 m; Moroni, 17 m. CLINO periods: Dzaoudzi/Pamanzi, 1951-70; Moroni, 1951-70. Means were computed by:

1/4(mean maximum for the day plus mean minimum for the day plus mean maximum for the night plus mean minimum for the night)

Temperature:

1/2(mean daily maximum plus mean daily minimum)

STATION NOTES

COOK ISLANDS (5 stations)

General:

Observations were made at 09h local time.

Pressure:

The mean of the 09h observations corrected to sea level.

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Precipitation:

The total of the daily amounts.

Station Data:

Name	Barometer height (m)	CLINO Periods Pressure	Temperature	Precipitation
Aitutaki	6	1946-70	1941-70	1941-70
Penrhyn	2	1941-70	1941-70	1941-70
Pukapuka	3	1941-70	1941-70	1941-70
Rakahanga	5	1952-70	1941-70	1941-70
Rarotonga	7	1941-70	1941-70	1941-70

STATION NOTES

ELLICE ISLANDS (TUVALU) (2 stations)

General:

Observations were made at 09h local time.

Pressure:

The mean of the 09h observations corrected to sea level.

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Precipitation:

The total of the daily amounts.

Station Data:

Name	Barometer height (m)	Pressure	CLINO Periods Temperature	Precipitation
Funafuti	2	1947-70	1947-78	1941-78
Niulakita	3	-	1957-77	1947-77

FAROES (1 station)

General:

Mean pressure and temperature were calculated as the means of 8 daily observations of 00, 03, 06, 09, 12, 15, 18, and 21h GMT.

Precipitation data from neighboring stations (Torshavn and Hoyvik) have shown differences so large in the past that they were unsuitable for publication in the 1951-60 edition. However, the 1951-60 data for Hoyvik are now considered to be reliable and included in this edition with the Thorshavn data.

STATION NOTES

FIJI ISLANDS (7 stations)

General:

The mean values of pressure and temperature were based on observations at the four main synoptic hours (00, 06, 12 and 18h GMT) for all stations. Geographical coordinates are given in the table headings.

The CLINO data were based on existing lengths of record up to and including 1970 for the stations concerned. Temperature and precipitation observed at heights of 1.3 m and 30 cm, respectively.

Nambouwalu:

CLINO periods: temperature, 1956-70; precipitation, 1941-70. Barometer height, 35.7 m.

Nandi:

CLINO periods: pressure, 1943-70; temperature, 1943-70; precipitation, 1942-70. Site change 0.5 km May 1965. Previous barometer height, 15.7 m. Barometer height, 18.4 m.

Ono-I-Lau:

CLINO periods: pressure, 1945-70; temperature, 1944-70; precipitation, 1943-70. Barometer height, 28.1 m.

Rotuma:

CLINO periods: pressure, 1949-70; temperature, 1947-70. Barometer height, 25.9 m.

Suva/Lauthala Bay:

CLINO periods: pressure, 1945-70; temperature, 1944-70; precipitation, 1943-70. Barometer height, 9.6 m.

Undu Point:

CLINO periods: pressure, 1955-70; temperature, 1955-70; precipitation, 1946-70. Barometer height, 63.4 m.

Yasawa-I-Rara:

CLINO periods: pressure, 1951-70; temperature, 1950-70; precipitation, 1950-70. Barometer height, 49.7 m.

STATION NOTES

GAMBIER ISLANDS (1 station)

General:

Latitude, longitude, and elevation given in the table heading were those in use when the station, Rikitea, closed in December 1967. Barometer height 3 m.

Pressure:

1/4(mean maximum for the day plus mean minimum for the day plus mean maximum for the night plus mean minimum for the night)

Temperature:

1/2(mean daily maximum plus mean daily minimum)

GILBERT ISLANDS (KIRIBATI) (2 stations)

General:

Observations were made at 09h local time.

Pressure:

The mean of the 09h observations corrected to sea level.

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Precipitation:

The total of the daily amounts.

Station Data:

Name	Barometer height (m)	CLINO Periods Pressure	Temperature	Precipitation
Arorae	7	-	1956-77	1950-76
Tarawa	3	1947-70	1947-78	1946-78

STATION NOTES

GREENLAND (13 stations)

Pressure:

Mean daily pressure values were determined by 1/8(00+03+06+09+12+15+18+21))h GMT except for the following three stations:

Ivigtut:

1/3(11+17+24)h GMT

Jakobshavn and Dundas:

1/3(00+12+18)h GMT

Monthly mean pressure was the average of the daily mean pressures.

Pressure data not previously published for Thule, 1947-52, Dundas, 1953-60, and Godthab, 1951-60, are included in this edition. The Godthab data were from the synoptic station (the climatic station closed in 1968).

Temperature:

Mean daily temperatures were calculated by:

1/8(00+03+06+09+12+15+18+21)h GMT

except for the following three stations:

Ivigtut:

Mean temperatures were calculated on the observations at 11, 17, and 24h GMT, by using a correction C on the rough mean temperature m that is calculated according to the formula:

m = 1/9(2(T11)+2(T17)+5(T24))

where T11 is the monthly mean temperature at 11h and so on. The correction C depends on the mean amplitude S, where

S= T17 - 1/2(T11 + T24).

STATION NOTES

GREENLAND (con.):

At the top of the table below this correction C is found for every month by the mean amplitude S. Adding C to the rough mean temperature m gives the true mean temperature m+C.

Calculation of C from S

Correction C	-0.0	-0.1	-0.2
June S =	0.0-1.3	1.4-4.1	4.2-6.9
July S =	0.0-1.4	1.5-4.4	4.5-7.4
August S =	0.0-1.1	1.2-3.5	3.6-5.9

In the remaining months: C=0.

Jakobshavn:
The data were from the synoptic station (the climatic station closed in 1962). Mean temperatures were calculated by:

$$1/6(4(T00)+T12+T18)$$

where T00 signifies the monthly mean temperature at 00h and so on.

Dundas:
Large temperature differences exist between data from this station and Thule A.B. situated about 4 km SW of Dundas. Data from Thule A.B. have been published in the earlier edition. Comparing these data with data from Dundas demonstrates very clearly the uncertainty of the data. see the difference table below.

Temperature differences. Thule A.B.-Dundas

GREENLAND (con.):

Precipitation:

At some settlements in Greenland, measurements of precipitation have been carried out at two neighboring places for several years. A comparison between such stations has very clearly confirmed that the measuring details have been so divergent that the data were not fit for publication in the previous period 1951-60. However, the data may be of some interest in spite of the great uncertainty, which is clearly documented in the four difference tables below.

Precipitation differences. Synoptic-climatic station.

STATION NOTES

HAWAII (16 stations)

General:

Station names, elevations, and coordinates in the table headings were those in use at the end of 1970 or for the last year of data published.

Station Pressure:

Monthly means of station pressure were computed using eight observations per day.

Sea Level Pressure:

The monthly mean sea level pressures were computed by summing all observed station pressures reduced to sea level and dividing by the number of observations.

Temperature:

The monthly mean temperature is one-half the sum of the monthly mean daily maximum and the monthly mean daily minimum temperatures. Temperatures were not adjusted for changes in location.

Precipitation:

An 8-inch or tipping bucket rain gauge was used to measure precipitation.

STATION NOTES

STATION NOTES

ICELAND (8 stations)

General:

The latitude, longitude, and elevation given in the table headings were those in use at the close of 1970.

Thermometer huts and precipitation gauges:

The stations Akureyri, Grimsey, Holar-Hofn I Hornafiroi, Keflavik, Reykjavik, Stykkisholmur, and Vestmannaeyjar were equipped with freely exposed thermometer huts and precipitation gauges with a modified type of Nipher's shield.

At Teigarhorn an old thermometer wall screen was replaced by a freely exposed hut in August 1964. The precipitation gauge had been shielded from August 1964. Simultaneous readings were taken in the wall screen and the hut during the period September 1964-December 1966. Differences are listed below. (Positive values indicate higher temperatures in the freely exposed hut).

GMT	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
09	0.3	0.4	0.3	0.0	-0.4	-0.4	-0.5	-0.3	0.0	0.1	0.3	0.3
15	0.3	0.3	-0.2	-0.7	-1.7	-0.9	-1.6	-0.7	-0.6	-0.1	0.1	0.2
21	0.3	0.5	0.2	-0.2	-0.5	-0.7	-0.8	-0.6	-0.1	0.1	0.1	0.2

The station Holar I Hornafiroi 64 18 N, 15 12 W, height 17 m was moved to the village Hofn I Hornafiroi 64 15 N, 15 11 W, height 8 m, in June 1965. Both sites have the same international block number and the data are here listed under the combined name Holar-Hofn I Hornafiroi. Temperature measurements at both sites during 1966-1970 give the following mean differences (negative values indicate lower temperatures at Hofn).

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
-0.3	-0.2	-0.2	-0.5	-0.2	-0.2	-0.2	-0.3	-0.5	-0.3	-0.3	-0.2

Precipitation measurements during 1966-1970 gave the mean annual ratio for Hofn/Holar =0.89.

Only minor changes had occurred at other stations during the period 1961-1970. The coordinates have not changed, but minor changes in height have occurred.

ICELAND (con.):

Mean monthly values of temperature and pressure:

At Akureyri, Holar-Hofn I Hornafiroi, Keflavik, Reykjavik, Stykkisholmur and Vestmannaeyjar, observations were made at the 8 synoptic hours (03, 06, 09, 12, 15, 18, 21 and 24h GMT) and mean monthly values were computed as the arithmetic mean of all observations. At Grimsey, mean pressures were computed as the arithmetic mean of 6 observations per day (09, 12, 15, 18, 21 and 24h). At Grimsey and Teigarhorn, 1/2(09h + 21h)+C1 was used to calculate mean temperatures. The values of C1 are listed below in 1/100 degrees C.

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Grimsey	00	15	30	20	-05	-15	-10	05	20	25	05	00
Teigarhorn	00	20	30	15	-05	-10	-05	05	25	30	10	00

Every barometer reading was reduced to mean sea level.

ILE EUROPA (1 station)

General:

Pressure reduced to 0 degrees C at the station level, after applying the instrument correction and the gravity correction. Barometer height, 13 m. CLINO period, 1951-70.

Pressure:

1/4(mean maximum for the day plus mean minimum for the day plus mean maximum for the night plus mean minimum for the night)

Temperature:

1/2(mean daily maximum plus mean daily minimum)

STATION NOTES

ILE NOUVELLE AMSTERDAM (1 station)

General:

Pressure reduced to 0 degrees C at the station level, after applying the instrument correction and the gravity correction. Barometer height, 28 m. CLINO period, 1950-70.

Pressure:

1/4(mean maximum for the day plus mean minimum for the day plus mean maximum for the night plus mean minimun for the night)

Temperature:

1/2(mean daily maximum plus mean daily minimum)

ILES GLORIEUSES (1 station)

General:

Pressure reduced to 0 degrees C at the station level after applying the instrument correction and the gravity correction. Barometer height, 4 m. CLINO period, 1961-70.

Pressure:

1/4(mean maximum for the day plus mean minimum for the day plus mean maximum for the night plus mean minimum for the night)

Temperature:

1/2(mean daily maximum plus mean daily minimum)

STATION NOTES

ILES KERGUELEN (1 station)

General:

Latitude, longitude, and elevation given in the table heading were those in use at the close of 1970. In 1964 Port Aux Francais moved from 49 20 S, 70 13 E (station elevation, 18 m).

Pressure reduced to 0 degrees C at the station level, after applying the instrument correction and the gravity correction. Barometer height, 1964-70, 30 m. CLINO period 1951-70.

Pressure:

1/4(mean maximum for the day plus mean minimum for the day plus mean maximum for the night plus mean minimum for the night)

Temperature:

1/2(mean daily maximum plus mean daily minimum)

ILE TROMELIN (1 station)

General:

Pressure reduced to 0 degrees C at the station level, after applying the instrument correction and the gravity correction. Barometer height, 13 m. CLINO period, 1955-70

Pressure:

1/4(mean maximum for the day plus mean minimum for the day plus mean maximum for the night plus mean minimum for the night)

Temperature:

1/2(mean daily maximum plus mean daily minimum)

STATION NOTES

INDONESIA (41 stations)

General:

Latitude, longitude, and elevation values shown in the table headings were as given by the Meteorological Service for the area and were assumed to be in use at the close of 1970.

JOHNSTON ISLAND (1 station)

General:

Station name, elevation, and coordinates given in the table heading were those in use at the end of 1970.

Station Pressure:

Monthly means of station pressure were computed using eight observations per day. Barometer height, 3 m.

Sea Level Pressure:

Monthly mean sea level pressures were computed by summing all observed station pressures reduced to sea level and dividing by the number of observations. Barometer height for reduction to sea level, 5 m.

Temperature:

Monthly mean temperature is one-half the sum of the monthly mean daily maximum and monthly mean daily minimum temperatures. Thermometer height, 2 m.

Precipitation:

An 8-inch or tipping bucket rain gauge was used to measure precipitation. Rain gauge height, 1 m.

STATION NOTES

LINE ISLANDS (2 stations)

Christmas Island:

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Precipitation:
Total of the daily amounts measured at 09h local time.

Fanning Island:

Temperature:

1/2(mean daily maximum plus mean daily minimum). Thermometer in screen 1 m above the ground.

Precipitation:
The total of the daily amounts.

LORD HOWE ISLAND (1 station)

General:
Latitude, longitude, and elevation given in the table heading were those in use at the close of 1970. CLINO data have been taken from WMO/OMM No. 117 T.P.52 (1931-60).

Temperature:
Thermometers were suspended in a Stevenson screen with the bulb approximately 1.2 m above ground, and the rain gauge rim .30 m above ground level. Temperature means were calculated by:

1/2(mean daily maximum plus mean daily minimum)

Precipitation:
Daily measurements were made at 09h local standard time. Data were recorded in points and subsequently converted to tenths of a mm. Amounts less than one-half point were recorded as zero.

STATION NOTES

MACQUARIE ISLAND (1 station)

General:

Latitude, longitude, and elevation given in the table heading were those in use at the close of 1970. The CLINO data have been taken from WMO/OMM No. 117 T.P.52 (1931-60).

Instrumentation:

Thermometers were suspended in a Stevenson screen with the bulb approximately 1.2 m above the ground, and the rain gauge rim 0.30 m above ground level. Kew pattern mercury-in-glass barometer was used. Barometer height, 6 m.

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Precipitation:

Daily measurements were made at 09h local standard time. Data were recorded in points and subsequently converted to tenths of mm. Amounts less than one-half point were recorded as zero.

Pressure:

Station pressure was corrected to 0 degrees C and standard gravity of 9.80665 m per second square. The method used to reduce pressure to MSL assumed a fictitious column of air with a constant lapse rate of 0.0065 degrees C per gpm. Temperature and humidity at the top of the column were given by the station's mean monthly temperature and vapor pressure. Pressures were calculated according to the formula:

1/2(09h + 15h)LST

NEWARK PUBLIC LIBRARY

STATION NOTES

MALAGASY REPUBLIC (10 stations)

General:

The coordinates and heights of the barometric cups are given at the top of each table heading for the 1961-70 period. At Antalaha the barometer height changed from 23 m to 6 m on 1 June 1966. Station pressure at Tananarive SCM was adjusted to 800 mb. The height of the thermometers and rain gauges were 1.5 m. Maximum temperatures were from 07h-07h LST. Minimum temperatures were from 17h-17h LST. Precipitation was measured from 07h-07h LST.

Pressure:

Mean of hourly pressures.

Temperature:

1/2(maximum plus minimum)

MALAYSIA (17 stations)

General:

Latitude, longitude, and elevation given in the table headings were those in use at the close of 1970. Changes in station location are given in the table below.

Station Pressure:

For stations Penang, Kota Bharu, Kuala Lumpur, and Kuantan, the monthly mean was the arithmetic mean of 24 hourly readings.

For stations Alor Star, Kuala Trengganu, Ipoh, Sitiawan, Cameron Highlands, Mersing, Malacca, Kota Kinabalu, Sandakan, Miri, Bintulu, Kuching, and Sibu, data on station pressure were not available.

Sea Level Pressure:

For stations Penang, Kota Bharu, Kuala Lumpur and Kuantan, the monthly mean was the arithmetic mean of 24 hourly readings.

For stations Alor Star, Kuala Trengganu, Ipoh, Sitiawan, Cameron Highlands, Mersing, Malacca, Kota Kinabalu, Sandakan, Miri, Bintulu, Kuching, and Sibu, data on sea level pressure were not available.

Temperature:

The arithmetic mean of 24 hourly readings.

Precipitation:

The total of the daily amounts.

STATION NOTES

MALAYSIA (con.):

Instrumentation:

Stevenson screen with dry and wet bulb thermometers, maximum and minimum thermometers, mercury barometer (Kew type), and a 127 mm rain gauge were the equipment used.

Changes in station locations:

Station	WMO Station Number	Date (month/year)	Location		Height of Station above MSL (m)	Height of Barometer above MSL (m)
			Lat	Long		
Kuala Lumpur	48647	1/61- 8/65	03 07 N	101 12 E	34	38.4
Kuantan	48657	1/61- 9/68	03 46 N	103 12 E	19	21.0

Sibu	96421	1/62-11/67	02 20 N	111 50 E	6	7.0

ht=1.2 m for all stations
hr=0.3 m for all stations

MARCUS ISLAND (1 station)

Pressure:

Barometer height, 17 m until 1/7/63; 7 m after 1/7/63. Barometer height for reduction to sea level, 17 m.

Precipitation:

An 8-inch or tipping bucket rain gauge was used. Rain gauge height, 1 m.

Temperature:

Thermometer height, 2 m.

NEWARK PUBLIC LIBRARY

STATION NOTES

MARIANA ISLANDS (4 stations)

General:

Station names, elevations, and coordinates in the table headings were those in use at the end of 1970 or for the last year of data published.

Station Pressure:

Monthly means of station pressure were computed using eight observations per day.

Temperature:

The monthly mean temperature is one-half the sum of the monthly mean daily maximum and the monthly mean daily minimum temperatures. Temperatures were not adjusted for changes in location.

Precipitation:

An 8-inch or tipping bucket rain gauge was used to measure precipitation.

STATION NOTES

MARQUESAS ISLANDS (1 station)

General:

The elevation of the station at Atuona was 60 m with a barometer height of 61 m until August 1965 when these heights were changed to 51.3 m for the station and 52.3 m for the barometer. Latitude, longitude, and elevation given in the table heading were those in use at the close of 1970.

Pressure:

1/4(mean maximum for the day plus mean minimum for the day plus mean maximum for the night plus mean minimum for the night)

Temperature:

1/2(mean daily maximum plus mean daily minimum)

NEWARK PUBLIC LIBRARY

STATION NOTES

MARSHALL ISLANDS (3 stations)

General:

Station names, elevations, and coordinates in the table headings were those in use at the end of 1970 or for the last year of data published.

Station Pressure:

Monthly means of station pressure were computed using eight observations per day.

Sea Level Pressure:

The monthly mean sea level pressures were computed by summing all observed station pressures reduced to sea level and dividing by the number of observations.

Temperature:

The monthly mean temperature is one-half the sum of the monthly mean daily maximum and the monthly mean daily minimum temperatures. Temperatures have not been adjusted for changes in location.

Precipitation:

An 8-inch or tipping bucket rain gauge was used to measure precipitation.

Station Data:

Date	Station Name	Lat	Long	H	Hz	Hp	ht	hr
1/1/61-5/8/69	Enewetak	11 21 N	162 20 E	4	5	6	2	1
6/8/69-31/12/70		11 21 N	162 21 E	3	4	6	2	1
1/1/61-31/12/70	Kwajalein	08 44 N	167 44 E	2	3	8	2	1
1/1/61-31/12/70	Majuro	07 05 N	171 23 E	3	3	3	2	1

STATION NOTES

MAURITIUS (5 stations)

Instrumentation:

Agalega-instrumentation consisted of mercury-in-glass maximum and alcohol-in-glass minimum thermometers, a Kew pattern barometer, an electric contact cup anemometer, and a 5-inch rain gauge.

Diego Garcia-instrumentation consisted of mercury-in-glass maximum and alcohol-in-glass minimum thermometers, a Kew pattern barometer, an electric cup anemometer, and a 5-inch rain gauge.

Plaisance-instrumentation consisted of mercury-in-glass maximum and alcohol-in-glass minimum thermometers, a Kew pattern barometer, a Dines pressure tube anemograph, and 5-inch rain gauge.

Rodrigues-instrumentation consisted of mercury-in-glass maximum and alcohol-in-glass minimum thermometers, a Fortins barometer, a Dines pressure tube anemograph, and a 5-inch rain gauge.

St. Brandon-instrumentation consisted of mercury-in-glass maximum and alcohol-in-glass minimum thermometers, a Kew pattern barometer, electric contact cup anemometer, and a 5-inch rain gauge.

Station Data:

Station	Hz (m)	ht (m)	hr (cm)
Agalega	3	1.35	30
Diego Garcia	3	1.35	30
Plaisance	57	1.35	30
Rodrigues	59	1.35	30
St. Brandon	4	1.35	30

Formula used for computing means, 1961-70:

Mean Daily Temperature: 1/2(daily maximum plus daily minimum)

Mean Daily Pressure: 1/4(00h + 06h + 12h + 18h)

Mean Monthly Precipitation: (sum of monthly totals)/(number of months)

STATION NOTES

MIDWAY ISLAND (1 station)

General:

Station name, elevation, and coordinates given in the table heading were those in use at the end of 1970.

Station Pressure:

Monthly means of station pressure were computed using eight observations per day. Barometer height, 10 m.

Sea Level Pressure:

Monthly mean sea level pressures were computed by summing all observed station pressures reduced to sea level and dividing by the number of observations.

Temperature:

Monthly mean temperature is one-half the sum of the monthly mean daily maximum and the monthly mean daily minimum temperatures. Themometer height, 10 m.

Precipitation:

An 8-inch or tipping bucket rain gauge was used to measure precipitation. Rain gauge height, 10 m.

STATION NOTES

NEW CALEDONIA (4 stations)

General:

Latitude, longitude, and elevation given in the table headings were those in use at the close of 1970.

Pressure:

1/4(mean maximum for the day plus mean minimum for the day plus mean maximum for the night plus mean minimum for the night)

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Station Histories:

Name	Date (month/year)	Location Lat	Location Long	Station Height (m)	Barometer Height (m)
Koumac	01/61-11/63	20 32 S	164 15 E		
	12/63-12/70	20 34 S	164 17 E	23	18
Noumea	01/61-01/69	27 17 S	166 27 E		75
	02/69-12/70	27 17 S	166 27 E	70	72
Tontouta	01/61-07/63	22 01 S	166 13 E	20	16
	08/63-12/69	22 01 S	166 13 E	36	37
	01/70-12/70	22 01 S	166 13 E	10	12

STATION NOTES

NEW HEBRIDES (3 stations)

General:
Latitude, longitude, and elevation given in the table headings were those in use at the close of 1970. The station and barometer heights at Luganville changed in May 1961 from 151 m and 153 m to 146 m and 147 m, respectively.

Pressure:

1/4(mean maximum for the day plus mean minimum for the day plus mean maximum for the night plus the mean minimum for the night)

Temperature:

1/2(mean daily maximum plus mean daily minimum)

NEW ZEALAND (16 stations)

General:
Latitude, longitude and the elevation of the climatological stations are given in the table headings, and were those applicable on 31 December 1970. Observations were made at 09h New Zealand Standard Time.

Pressure:
Mean of the 09h observations, corrected to sea level. Barometer cistern heights are shown in individual station notes.

Temperature:

1/2(mean daily maximum plus mean daily minimum).

Precipitation:
The totals of the daily amounts.

STATION NOTES

NEW ZEALAND (con.):

Station Data:

Notes on the stations follow in alphabetical order. Some CLINOs have been established by neighbor-station comparisons. All temperatures were observed at the standard height of 1.3 m and rain gauge rims at 30 cm.

Albert Park, Auckland:

This station was located in a central city park which was becoming increasingly enclosed. Temperature and precipitation records described in the 1951-60 volume as "Auckland City". Pressure recorded 1 km to the west in the City forecasting office. Barometer cistern height: 1961-August 1962, 4.6 m; August 1962-1970, 38.6 m. This station opened 1909. CLINO periods: temperature and precipitation, 1941-70 pressure, Mechanics Bay 1948-62, City 1962-70.

Campbell Island:

Station opened July 1941. Site changes April 1957. CLINO period July 1941-1970. Barometer cistern height, 18.9 m.

Chatham Islands, Waitangi:

Station opened January 1951. Minor site changes 1954, 1956, 1957, 1959. CLINO period, 1951-70. Barometer cistern height, 47.9 m.

Christchurch:

Magnetic Observatory/Botanical Gardens. Continuous record since January 1905. Increasingly enclosed site. Screen and small site change May 1952. CLINO period, 1941-70. Barometer cistern height, 8.5 m.

Christchurch Airport:

Station opened October 1943. Local site changes in July 1953, April 1956, and October 1960. CLINO periods: temperature and precipitation, 1941-70; pressure, October 1943-1970. Barometer cistern height, 34.4 m.

Dunedin Airport:

Current station opened in November 1962. Previously, observations done at Taieri 9 km to northeast. CLINO period, 1941-70. Barometer cistern height: 1941-November 1962, 24.7 m; November 1962-1970, 1.9 m.

Dunedin Musselburgh:

Current site opened (precipitation only) May 1925. Temperature at different sites prior to November 1947 and October 1960. CLINO period, 1941-70.

NEWARK PUBLIC LIBRARY

STATION NOTES

NEW ZEALAND (con:)

Hokitika Airport:

Site change from Hokitika South November 1963. Dual observations available November 1963-March 1965. Hokitika South opened 1866. CLINO period, 1941-70. Barometer cistern height, 39.6 m.

Invercargill Airport:

Station opened September 1939. CLINO periods: precipitation, 1941-70 pressure and temperature, October 1946-1970. Barometer cistern height, 1.1 m. Invercargill City station closed in July 1959.

Kaitaia Airport:

Station opened in January 1948. CLINO periods: pressure, November 1948-1970; temperature and precipitation, 1941-70. Barometer cistern height, 28.5 m.

Napier:

Observations from an enclosed city site. No pressure.

Nelson Airport:

Station opened April 1943. CLINO periods: temperature and precipitation, 1941-70; pressure, April 1943-1970. Barometer cistern height, 7.3 m.

New Plymouth Airport:

Observations in publication for 1951-60 were (except pressure) from Marsland Hill. Station opened December 1944, but there was a 2 km site change in May 1968. CLINO period, December 1944-1970. Barometer cistern height, 48.3 m.

Raoul Island:

Station opened 1937. CLINO period, 1941-70. Barometer cistern height, 49.1 m.

Wellington, Kelburn:

Observations at present site since January 1928. CLINO period, 1941-70. Barometer cistern height: February 1941-1968, 119.2 m; February 1968-1970, 127.8 m.

Whenuapai Airport:

Station opened November 1943. CLINO periods: pressure, November 1943-1970; temperature and precipitation, 1941-70. Barometer cistern height, 27.3 m.

STATION NOTES

NIUE ISLANDS (1 station)

General:

Observations were made at 09h local time. CLINO period, 1941-70.

Pressure:

The mean of the 09h observations corrected to sea level. Barometer cistern height, 56 m.

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Precipitation:

The total of the daily amounts.

NEWARK PUBLIC LIBRARY

STATION NOTES

NORFOLK ISLAND (1 station)

General:

Latitude, longitude, and elevation given in the table heading were those in use at the close of 1970. The CLINO data have been taken from WMO/OMM No. 117 T.P.52 (1931-60).

Instrumentation:

Thermometers were suspended in a Stevenson screen with the bulb approximately 1.2 m above the ground, and the rain gauge rim 0.30 m above ground level. Kew pattern mercury-in-glass barometer was used. Barometer height, 109 m.

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Precipitation:

Daily measurements were made at 09h local standard time. Data were recorded in points and subsequently converted to tenths of mm. Amounts less than one-half point were recorded as zero.

Pressure:

Station pressure was corrected to 0 degrees C and standard gravity of 9.80665 m per second square. The method used to reduce pressure to MSL assumed a fictitious column of air with a constant lapse rate of 0.0065 degrees C per gpm. Temperature and humidity at the top of the column were given by the station's mean monthly temperature and vapor pressure. Pressures were calculated according to the formula:

1/2 (09h + 15h)LST

STATION NOTES

OCEAN IS. (BANABA) (1 station)

General:
Observations were made at 09h local time.

Pressure:
The mean of the 09h observations corrected to sea level. CLINO period, 1953-70. Barometer cistern height, 66 m

Temperature:

1/2(mean daily maximum plus mean daily minimum). CLINO period, 1953-78.

Precipitation:
The total of the daily amounts. CLINO period, 1953-78.

OCEAN WEATHER STATIONS (12 stations)

General:
The positions given were the centers of the station squares. The ship was " on station " when it was within a 210 nautical mile square centered on its assigned position. Pressure and temperature were the means of 8 observations made daily at 3 hourly intervals, starting at 00h GMT. Precipitation, when presented was for the 24-hour period ending at 00h GMT. Services supplying the data are credited below:

Station	Country	Assigned Lat	Position Long
A	United Kingdom	62 00 N	33 00 W
B	United States	56 30 N	51 00 W
C	United States	52 45 N	35 30 W
D	United States	44 00 N	41 00 W
E	United States	35 00 N	48 00 W
I	United Kingdom	59 00 N	19 00 W
J	United Kingdom	52 30 N	20 00 W
K	France	45 00 N	16 00 W
M	Norway	66 00 N	02 00 E
N	United States	30 00 N	140 00 W
P	Canada	50 00 N	145 00 W
V	United States	34 00 N	164 00 E

NEWARK PUBLIC LIBRARY

STATION NOTES

PAPUA NEW GUINEA (5 stations)

General:

Latitude, longitude, and elevation given in the table headings were those in use at the close of 1970, and were unchanged throughout the period. The CLINO data have been taken from WMO/OMM No. 117 T.P. 52 (1931-60), which were calculated from only ten years of data (twenty years for Port Moresby).

Instrumentation:

Thermometers were suspended in a Stevenson screen with the bulb approximately 1.2 m above the ground, and the rain gauge rim 0.30 m above ground level. Kew pattern mercury-in-glass barometers were used. Barometer heights: Lae, 9 m; Madang, 12 m; Momote, 5 m; Port Moresby, 47 m; Rabaul, 9 m.

Temperature:

1/2(daily maximum temperature plus daily minimum temperature)

Precipitation:

Daily measurements were made at 09h local standard time. Data were recorded in points and subsequently converted to tenths of mm. Amounts less than one-half point (0-13 mm) were recorded as zero.

Pressure:

Station pressure is corrected to 0 degrees Celsius and standard gravity of 9.80665 m per second square. Pressure were calculated by:

1/2(09h + 15h)LST

STATION NOTES

PHILIPPINES (10 stations)

General:

Station names, elevations, and coordinates used in the table headings were those in use from 1961-70 except Surigao. From 1949-65 this station was located at 09 48 N, 125 29 E at an elevation of 8 m. From 1966-70 this station was located at 09 48 N, 125 30 E at an elevation of 21 m.

Observation times:

1. Observation times used in computing means were: 00, 06, 12, and 18h GMT.
2. Observation times when precipitation was measured were: every 3 hours starting at 00h GMT.

Formulae used in computing means were:

1. Mean Sea Level Pressure:
   All observation were corrected for temperature and altitude effects.

   mean daily= 1/4(sum of pressure)

   mean for the month=(sum of mean daily)/(number of days in month)

   monthly mean=(sum of mean for month)/(number of years)

2. Mean Temperature= 1/2(daily maximum temperature plus daily minimum temperature)

3. Mean Rainfall=(sum of monthly rainfall)/(number of years)

Height of the barometer above sea level(Hz), the height of the thermometer (ht) and rain gauge(hr) above the ground are listed in the following table:

Station	Hz	ht	hr
Aparri	3.0 m	1.8 m	1.0 m
Basco	11.0 m	1.8 m	1.0 m
Cebu	35.0 m	1.8 m	1.0 m
Dagupan	3.0 m	1.8 m	1.0 m
Iloilo	8.0 m	1.8 m	1.0 m
Legaspi	11.0 m	1.8 m	1.0 m
Manila Intl Airport	11.0 m	2.0 m	1.1 m
Surigaon	21.0 m	1.8 m	1.0 m
Tacloban	21.0 m	1.8 m	1.0 m
Zamboanga	6.0 m	1.8 m	1.0 m

NEWARK PUBLIC LIBRARY

STATION NOTES

PHOENIX ISLANDS (1 station)

General:

Barometer height, 4 m; thermometer height, 2 m; rain gauge height, 1 m. Station closed 15/9/67.

PITCAIRN ISLAND (1 station)

General:

Observations were made at 09h local time. CLINO period, 1941-70.

Pressure:

The mean of the 09h observations corrected to sea level. Barometer cistern height, 265 m.

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Precipitation:

The total of the daily amounts.

STATION NOTES

REPUBLIC OF NAURU (1 station)

General:

Latitude, longitude, and elevation given in the table heading were those in use at the close of 1970.

Instrumentation:

Thermometers were suspended in a Stevenson screen with the bulb approximately 1.2 m above the ground, and the rain gauge rim 0.30 m above ground level. Kew pattern mercury-in-glass barometer was used. Barometer height, 20 m.

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Precipitation:

Daily measurements were made at 09h local standard time. Data were recorded in points and subsequently converted to tenths of mm. Amounts less than one-half point were recorded as zero.

Pressure:

Station pressure was corrected to 0 degrees C and standard gravity of 9.80665 m per second square. The method used to reduce pressure to MSL assumed a fictitious column of air with a constant lapse rate of 0.0065 degrees C per gpm. Temperature and humidity at the top of the column were given by the station's mean monthly temperature and vapor pressure. Pressures were calculated according to the formula:

1/2(09h + 15h)LST

NEWARK PUBLIC LIBRARY

STATION NOTES

REUNION ISLAND (2 stations)

General:

Pressure reduced to 0 degrees C at the station level after applying the instrument correction and the gravity correction. Barometer heights: St. Denis/Gillot, 12 m; St. Pierre, 53 m. CLINO periods: St Denis/Gillot, 1953-70; St. Pierre, 1951-70.

Pressure:

1/4(mean maximum for the day plus mean minimum for the day plus mean maximum for the night plus mean minimum for the night)

Temperature:

1/2(mean daily maximum plus mean daily minimum)

SAMOAN ISLANDS (1 station)

General:

Observations were made at 09h local time. CLINO period, 1941-70.

Pressure:

The mean of the 09h observations corrected to sea level. Barometer cistern height, 2 m.

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Precipitation:

The total of the daily amount.

STATION NOTES

SAO TOME and PRINCIPE (2 stations)

General:

The station of Sao Tome was located at Sao Tome Airport. Principe was located in the town of Santo Antonio, on Principe Island. Precipitation was measured at 09h GMT.

Pressure:

Daily mean: 1/3(09h + 15h + 21h)GMT
Monthly mean: mean of daily means

Temperature:

Daily mean: 1/2(maximum plus minimum)
Monthly mean: mean of daily means

Instrument Heights(m):

	Hz	ht	hr
Sao Tome	13	1.5	1.5
Principe	5	1.5	1.5

NEWARK PUBLIC LIBRARY

STATION NOTES

SINGAPORE (1 station)

Paya Lebar Airport

General:

The station was opened in August 1955. The latitude, longitude, and elevation given in the table heading were those in use at the close of 1970. Changes in station location are listed below:

Dates	Lat	Long	Elev (m)
January 1960-March 1968	01 21 N	103 54 E	7.6
April 1968-December 1970	01 22 N	103 55 E	32.0

Instrumentation:

1. Pressure: Casella Kew Pattern mercury barometer, 32.9 m above mean sea level.
2. Precipitation: Casella 194 Tilting Siphon, 12.6 cm diameter, .3 m above ground.
3. Temperature: Casella thermometer in Stevenson screen, 1.2 m above ground.

Observation times and formulae used in computing means:

1. Station Pressure: 1/8(00h+03h+06h+09h+12h+15h+18h+21h)GMT
2. Sea Level Pressure: The arithmetic mean of the 24-hourly GMT reading.
3. Temperature: The arithmetic mean of the 24-hourly GMT readings.
4. Precipitation: The total of the daily amounts measured at 00h GMT.

STATION NOTES

SOCIETY ISLANDS (3 stations)

General:

Latitude, longitude, and elevation given in the table headings were those in use at the close of 1970. Bora Bora was located at 16 30 S, 151 45 W until January 1966 when the station was moved to 16 29 S and 151 45 W.

Pressure:

1/4(mean maximum for the day plus mean minimum for the day plus mean maximum for the night plus mean minimum for the night)

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Barometer height:

Bora Bora, 3 m; Mopelia, 3 m; Tahiti-Faaa, 2 m.

NEWARK PUBLIC LIBRARY

STATION NOTES

SOLOMON ISLANDS (2 stations)

General:

Latitude, longitude, and elevation given in the table headings were those in use at the close of 1970. The CLINO data have been taken from WMO/OMM No. 117 T.P. 52 (1931-60).

The barometer height at Munda Mission was changed on 24 July 1961 from 7.3 m to 4.3 m. The barometer height at Honiara was 56 m.

Instrumentation:

Thermometers were suspended in a Stevenson screen with the bulb approximately 1.2 m above the ground and the rain gauge rim 0.30 m above ground level. Kew pattern mercury-in-glass barometer was used.

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Precipitation:

Daily measurements were made at 09h local standard time. Data were recorded in points and subsequently converted to tenths of mm. Amounts less than one-half point were recorded as zero.

Pressure:

Station pressure was corrected to 0 degrees C and standard gravity of 9.80665 m per second square. At Munda Mission where the barometer height has changed, decadal means of station pressure were not calculated. The method used to reduce pressure to MSL assumed a fictitious column of air with a constant lapse rate of 0.0065 degrees C per gpm. Temperature and humidity at the top of the column were given by the station's mean monthly temperature and vapor pressure. Pressures were calculated using 1/2(09h + 15h)LST.

STATION NOTES

ST. HELENA (1 station)

General:
Observations were made at 00, 06, 12, and 18h GMT. Maximum and minimum daily temperatures were read at 06h and 18h GMT respectively. Precipitation was the monthly total, rounded to the nearest whole millimeter of the daily amounts based on readings made at 06h GMT.

Pressure:

1/4(00 + 06 + 12 + 18)h GMT

Temperature:

1/2(mean maximum plus mean minimum)

Precipitation:
The total of daily amounts.

Instrument heights:
Barometer, 629 m; thermometer, 1.2 m; rain gauge, .33 m.

TOKELAU ISLANDS (2 stations)

General:
Observations were made at 09h local time.

Temperature:

1/2(mean daily maximum plus mean daily minimum).

Precipitation:
The total of the daily amounts.

NEWARK PUBLIC LIBRARY

STATION NOTES

TONGA ISLAND (2 stations)

General:
Observations were made at 09h local time.

Temperature:

1/2(mean daily maximum plus mean daily minimum)

Precipitation:
The total of the daily amount.

TUAMOTU ISLANDS (1 station)

General:
Latitude, longitude, and elevation given in the table heading were those in use at the close of 1970. Barometer height, 3 m.

Pressure:

1/4(mean maximum for the day plus mean minimum for the day plus mean maximum for the night plus mean minimum for the night)

Temperature:

1/2(mean daily maximum plus mean daily minimum)

VOLCANO ISLANDS (1 station)

General:
Longitude and elevation corrected from 1951-60 edition.

WAKE ISLAND (1 station)

General:

Station name, elevation, and coordinates given in the table heading were those in use at the end of 1970.

Station Pressure:

Monthly means of station pressure were computed using eight observations per day.

Sea Level Pressure:

Monthly mean sea level pressures were computed by summing all observed station pressures reduced to sea level and dividing by the number of observations.

Temperature:

Monthly mean temperature is one-half the sum of the monthly mean daily maximum and the monthly mean daily minimum temperatures.

Precipitation:

An 8-inch or tipping bucket rain gauge was used to measure precipitation.

Station Data:

Date	Station Name	Lat	Long	H	Hz	Hp	ht	hr
1/1/61-18/7/63	Wake Island	19 17 N	166 39 E	4	4	4	2	1
19/7/63-31/12/70		19 17 N	166 39 E	3	5	4	2	1

WALLIS ISLAND (1 station)

General:

Latitude, longitude, and elevation given in the table heading were those in use at the close of 1970. Barometer height, 12 m. The permanent station Aka-Aka was transferred to Hihifo on 13 July 1970.

Pressure:

1/4(mean maximum for the day plus mean minimum for the day plus mean maximum for the night plus mean minimum for the night)

Temperature:

1/2(mean daily maximum plus mean daily minimum)
